

DITA_Example

Chapter 1. DITA_Concept_Example

This is a description of a DITA concept. This is typically where you put information about new info that you are introducing to the user.

This is a paragraph.

- This is a unordered list
- This is another item in unordered list

This paragraph is nested below the unordered list.

This is a new paragraph.

Data

Now we have created a child of the first topic.

Chapter 2. DITA_Task_Example_Before

We inserted the task topic between our initial topics.

Chapter 3. DITA_Task_Example

This is an example of a DITA task topic

This outlines the steps in an example task

You will need to follow these steps to create a task

1. In Oxygen XM, select `File > New`
2. Select the task topic from the Framework Template folder.
3. Name your task topic
4. Follow the file path to the folder where you will save this task topic
5. Select **Save**
